

## Soil Test Submission Form

<b>Sample ID</b>	S0616-22B <span style="float: right;"><i>(for lab to fill out)</i></span>		
<b>Name</b>		<b>Phone</b>	<b>* Email <i>(to receive results)</i></b>
Amy John		347-407-1211	johna200@newschool.edu
<b>Test Requested (check box)</b>	<input checked="" type="checkbox"/> pH (\$5) <input type="checkbox"/> Soil class (jar test) (\$10) <input type="checkbox"/> Soluble salts (\$5) <input type="checkbox"/> Organic content (\$8) <input type="checkbox"/> NPK kits (\$10) <input type="checkbox"/> Lead screening with XRF (\$10)		<b>Test Packages</b> <input type="checkbox"/> Basic soil quality test (\$45) <input checked="" type="checkbox"/> Heavy metal & pH test (\$45) <input type="checkbox"/> Micro-nutrients & pH (\$20)
<b>Total cost:</b>	\$ 45	<b>Payment type:</b> paypal	
<b>Mailing Address</b>		<b>Garden Address</b> <small>(if different from mailing address)</small>	<b>Sample Description</b> (optional)
415 South Fifth Street 1R		<input checked="" type="checkbox"/> Home Garden <input type="checkbox"/> Community Garden	355 Washington #1

### ***Test Packages:***

**Basic soil quality test (\$45):** Soil samples are screened for (1) pH, (2) salt content, (3) soil class using jar test, (4) NPK levels using field kits, and (5) lead, chromium and zinc using XRF analyzer. Results will be available within one week.

**Heavy Metal & pH test (\$45):** Soil samples are analyzed for (1) Chromium, Cobalt, Nickel, Copper, Zinc, Arsenic, Cadmium, Mercury and lead (2) pH. Results will be available after 2-4 weeks.

## Soil Testing Report

<b>Sample ID</b>	S0616-22B					
<i>Please do not write in spaces below; to be filled in by the lab</i>						
Date received: 12:00:00 AM				Date of Report:		
Soil Test Report	<b>BASIC SOIL QUALITY</b>					
	XRF Screening (ppm)		Soluble salts (ppm)			
	Lead (Pb)	22500	Soil pH	6.2	Nitrogen	
	Zinc (Zn)	4207	Soil class (jar test)		Phosphorus	
	Copper (Cu)	189	Note:		Potassium	
	Arsenic (As)	457			Note:	
	<b>Heavy Metals (ppm)</b> <small>*expressed by kg of dry soil</small>			<b>Micro Nutrients &amp; K (ppm)</b> <small>expressed by kg of dry soil</small>		
	(Cr) Chromium	96.0	B (Boron)			
	(Ni) Nickel	29.0	Mg (Magnesium)			
	(Cu) Copper	404.0	Al (Aluminum)			
	(Zn) Zinc	5443.0	K (potassium)			
	(As) Arsenic	17.6	Ca (Calcium)			
	(Cd) Cadmium	8.3	Mn (Manganese)			
	(Hg) Mercury	0.1	Fe (Iron)			
	(Pb) Lead	15911.0	Cu -63 (Copper)			
			Zn-66 (Zinc)			
			<b>Particle Analysis (hydrometer method)</b>			
			Gravel (%)			
			Sand (%)			
	Organic Content (%)					
	Comments:		Silt (%)			
			Clay (%)			
			Texture Class:			
			NOTES:			

Please check for general interpretations of data at our website [www.usi.nyc/soil-testing.html](http://www.usi.nyc/soil-testing.html)  
 Send a message to [soil@brooklyn.cuny.edu](mailto:soil@brooklyn.cuny.edu) if you have further questions.

## **Resources for Interpreting Your Results**

Click on the links to access information that will help you understand your results.

- [Heavy Metals](#) Interpretation Guidelines (If this link doesn't work for you, you can also find it on our website <http://www.usi.nyc/soil-testing.html> under "Resources" at the bottom of the page)
- Quick Facts on [Soil Parameters](#)
- EPA Eco-tools Urban Gardening: <https://clu-in.org/ecotools/urbangardens.cfm>

### *On Nutrients*

Understanding NPK levels in ppm: lb/acre divided by 2 gives you concentrations in ppm

<i>Nitrogen Levels</i>	
Low	40 lb A/6" soil
Medium	160 lb A/6" soil
High	320 lb A/6" soil
<i>Phosphorous Levels</i>	
Low	8 lb A/6" soil
Medium	20 lb A/6" soil
High	64 lb A/6" soil
<i>Potassium Levels</i>	
Low	40 lb A/6" soil
Medium	80 lb A/6" soil
High	160 lb A/6" soil
